Congress, Call Number: LC-HS503-1023

The program for the 41st Annual Convention is ready. After months of planning, scheduling, and collecting and reviewing submissions, we are proud to offer a lineup of events that will feature nearly 500 unique sessions over 4 days. In this special convention preview issue of Inside Behavior Analysis, we have highlighted the most exciting sessions of an excellent convention. On the pages that follow, you will find summaries of the B. F. Skinner Lecture Series, invited events and tutorials, special sessions for the Society for the Advancement of Behavior Analysis (SABA), the Professional Development Series, pre-convention workshops, and more. And these are only a few examples of the many papers, panels, posters, and symposia you will find during the convention to further your professional, academic, and personal pursuits. We are looking forward to a fun and informative convention and hope you plan to join us.

This year, we are excited to return to San Antonio, Texas, and the Henry B. Gonzalez Convention Center. A city with historical landmarks, unique architecture, and a pleasant May climate, San Antonio will provide plenty of leisure and entertainment options between sessions or in the evenings that follow a busy day of presentations. As the convention center is situated in the heart of the city's famous River Walk, you will find it easy to stretch your legs with a scenic stroll or to catch a meal at one of the many nearby cafes and restaurants. San Antonio is also home to the historic Alamo, several old Spanish missions, and an array of other important cultural sites. Additionally, you might be interested the San Antonio Zoo, Six Flags Fiesta Texas, Trader's Village, or one of the city's art museums. Our headquarter hotel, the Grand Hyatt San Antonio, is just steps away from the convention center and within walking distance of several popular attractions. Convention overflow hotels-the Hyatt Regency San Antonio Riverwalk, Hilton Palacio Del Rio, and Marriott Plaza San Antonio-are nearby, making it easy for you to meet-up with friends.

Beginning Friday and continuing into Saturday, you will have the option of attending a number of **pre-convention workshops**. This year, we'll be offering 59 workshops covering a variety of topics, including applied animal behavior, behavioral medicine, ethical practices,

and more. These sessions will allow you to learn new skills and earn both board certified behavior analyst and licensed psychologist continuing education (CE) credits. A complete list of workshops is available on pages 26–32.

On Saturday, the convention will open with the **2015 SABA Awards**. This special ceremony will recognize those individuals who have done exceptional work in or made significant contributions to behavior analysis. During this event, you will hear presentations on the best initiatives and research our field has to offer. Join us in recognizing the accomplishments of Sigrid Glenn (Award for Distinguished Service), Michael Keenan (Award for International Dissemination), Susan Schneider (Award for Effective Presentation of Behavior Analysis in the Mass Media), and Ron Van Houten (Award for Scientific Translation). To read the bios of the 2015 winners and the abstracts of their awards ceremony presentations see pages 8–10.

Learn from the findings and innovations of other fields by attending talks that are part of our popular **B. F. Skinner Lecture Series**. This year, we've once again assembled an impressive line-up of scholars that affirms our commitment to multi-disciplinary collaboration. The 2015 series will include 12 experts from diverse fields such as canid research, drug and alcohol addiction, the science of well-being, comparative cognition, neurobiology, and many others. You will find the full list of B. F. Skinner lecturers, along with the titles and subject areas of their talks, on pages 12–13.

You will also be able to choose from 30 **invited events and tutorials** covering the latest research and advances in behavior analysis. Topics this year will range from efforts to promote cultures of sustainability to NIHM domain criteria to the experimental analysis of social behavior. We are honored to provide a platform for some of the brightest and most engaging minds in the field and we hope you will take advantage of the opportunity to learn from behavior analysis's contemporary leaders. The full list of invited presentations and tutorials can be found on pages 14–17.

This year's **presidential scholar**, acclaimed author and biologist Sarah Blaffer Hrdy, will give a talk titled, "The Origin of Emotionally Modern Humans: How Did Humans Become Such 'Other-Regarding' Apes?" As the **See SAN ANTONIO on page 4**

SAN ANTONIO continued from page 3

title suggests, she will examine a key difference in the level of emotional development between humans and other apes—"other-regarding." You will also want to attend the special panel, "A Discussion With the 2015 Presidential Scholar," during which I, Sigrid Glenn, Ingunn Sandaker, Frances McSweeney, and Linda Parrott Hayes will sit down with Sarah Hrdy to talk about her scholarly work, particularly her views on the nature of motherhood and the evolutionary origins of empathy.

Martha Hübner, our incoming ABAI president, will enlighten us with her presentation, "Behavior Analysis Without Borders." This **Presidential Address** promises to be a thoughtful examination of the complex—and sometimes difficult—interaction between different domains of behavior analysis and will include several strategies for tearing down these "borders." Martha Hübner is a distinguished professor at the University of São Paulo and has been an indispensable figure in the growth and success of behavior analysis, not only in her home country of Brazil, but throughout the world.

The ABAI Student Committee has put together a terrific collection of panels designed to help students in behavior analysis programs transition from the classroom to careers in research and practice. The Professional Development Series will feature 18 discussions covering topics of interest to graduating students and young professionals from how to navigate licensure to collaborations with non-behavior analysts. Look to pages 19–21 for the complete list of **Professional Development Series** panels and speakers.

If you are a leader or officer in an ABAI affiliated chapter or special interest group (SIG), you'll want to join us in the Lone Star Ballroom of the Grand Hyatt San Antonio. Once again, we will offer our popular **chapter and SIG leadership trainings**. This year's training agenda will cover ABAI resources available to chapters and SIGs, choosing and making use of the proper technology for outreach and growth, and creating collaborations. More information on these sessions can be found on page 21. Both trainings are free for up to three officers per chapter or SIG. If the leader of your favorite chapter or group isn't aware of these trainings, please have them contact us for more information about attending.

Poster sessions will once more be an important component of the annual convention. This year, we hope to make these events more casual and fun with the addition of food tables and cash bars, giving poster attendees and presenters the option of purchasing a meal and refreshment while examining and discussing new research and innovations by up and coming behavior analysts.

Don't miss the chance to unwind and have fun with like-minded people at our social events. On Friday, drop in on one of the "welcome" sessions that will take place before the convention officially begins. The Friends of SABA Reception honors all of you who have provided financial support to SABA in 2014 and 2015. We hope to express our gratitude and share SABA's latest initiatives and developments. Later that evening, come celebrate ABAI's global reach and diversity during the International Reception, where you are invited to welcome our members traveling from more than 50 countries to attend the convention. Appetizers will be served and cash bars will be available at both these events. If you're looking to work in some exercise with your social activities, you will want to take part in one of the many events sponsored by the Health, Sports, Fitness SIG, including yoga and tai chi. Finally, don't miss the ABAI Social on Monday night as friends and colleagues gather for music and dancing. This year's social will include a panel discussion, "Pavlov, Skinner, & Kantor Walk Into a Bar ... " featuring Michael Domjan as Ivan Pavlov, Philip N. Hineline as B. F. Skinner, Linda J. Hayes as J. R. Kantor, and Michael Perone as the moderator. This event promises to be both enlightening and entertaining!

While at the convention, be sure to take advantage of the many services we will be offering on site. At the ABAI bookstore, you'll not only find hundreds of book titles, but also special convention merchandise like the new "Leaders in Behavior Analysis" coffee mug set featuring portraits and quotes from B. F. Skinner, Fred S. Keller, Murray Sidman, and Jack Michael. Throughout the convention, the bookstore will also host author signings, giving you some time to meet with your favorite writers on behavior analysis and have your books signed. Need CE? Come to the Continuing Education Desk to purchase the CE package, which will cover the cost of credits for all sessions that offer them. Additionally, the staff at the CE Desk can help with any questions you might have and with turning in your signed CE sheets. Looking for a job or work for an organization that's hiring? Visit the Jobs Booth for information on JobTarget, interview scheduling, and to post and review employment opportunities on the Jobs Board. Take a stroll through the Exhibit Hall to learn about the latest behavior analysis products and services and look for the "We're Hiring" signs to see which organizations are seeking new people to join their teams. Finally, don't forget to talk to an ABAI staff member at the Registration Desk and ask about the full range of association products and services that will be available on site. Our staff will be ready to assist you with renewing your membership, registering for an upcoming ABAI conference or convention, journal subscriptions, and more.

Mark Mattaini and Jesse Dallery, Program Committee co-chairs, have been outstanding in their oversight of the convention program and deserve our thanks. We also owe thanks to the work of Martha Hübner, Program Board coordinator, and this year's Program Board area coordinators: Marleen T. Adema, Mark P. Alavosius,

Christina A. Alligood, Cynthia M. Anderson, Anjali Barretto, Florence DiGennaro Reed, Barbara E. Esch, Jennifer N. Y. Fritz, Andrew W. Gardner, Scott T. Gaynor, website (visit www.abainternational.org/events/annual-2015 John Guercio, Jennifer Hammond, Nicole Heal, Per Holth, Amoy Hugh-Pennie, Matthew Johnson, Steven R. Lawyer, M. Christopher Newland, Martha Pelaez, Federico Sanabria, Angela Sanguinetti, Jessica Sassi, Mark Shriver, Sigurdur Oli Sigurdsson, Julie Slowiak, and Paul L. Soto. Through their efforts, the ABAI program receives careful review, with revisions and rejections, to ensure quality events. As always, ABAI staff members provide hours of hard work and dedication throughout the entire year to make this convention a success.

Start planning your convention experience with the complete convention program, now available on the ABAI and select "Program on the Web" from the links on the left). The online program will allow you to search by Nicole Luke, Megan E. Maxwell, Ed Morris, Eric Murphy, domain (applied research, basic research, service delivery, or theory); event number; keyword or key phrase; and author's last name. You will also be able to create event "wish lists" and personal schedules that will automatically be saved to your ABAI portal account, enabling easy and convenient printing wherever and whenever you need them.

See you in Texas!

The ABAI Cooperative Bookstore is pleased to offer titles relating to the field of behavior analysis at the 41st Annual Convention in San Antonio. The bookstore will be in in Exhibit Hall C of the Henry B. Gonzalez Convention Center.

Data Crunching: The 41st Annual Convention in Numbers

BY MARK MATTAINI

The Program Committee looks forward to another strong program at the 41st Annual Convention in San Antonio, TX. As in the past, our success is due to the continuous support provided by the ABAI administration staff and Executive Council. The following is a brief overview of the 2015 convention program.

Program Report

As this newsletter goes to press, there are 1,360 total submissions for 2015, including 638 posters, 269 panels and symposia, 87 papers, 36 invited addresses/B. F. Skinner Lectures, 16 invited tutorials, 62 business meetings, 16 reunions, 20 special events, 157 expo posters, and 59 workshops (Figure 1). Current guidelines in the call for papers state that (a) members are limited to one oral presentation and one discussant role; (b) presentations involving a single study should be submitted as posters, or submitted as part of an integrated symposium; (c) for

symposia, submissions that involved an integrated series of presentations organized around a central theme, involved presentations from multiple institutions rather than from a single laboratory, and contained a discussant outside of the presenting group are encouraged. In implementing these guidelines, the Program Committee has also strengthened their emphasis on the peer review role of area coordinators, including decisions to reject submissions that do not meet the expected level of scientific quality. In general, the membership has been quite supportive of these changes, but the committee will continue to review challenges and explore the need for further clarifications of guidelines as we go forward.

The number of submissions is lower than in recent years, particularly in papers and posters. The reduction in papers is consistent with the intention of Executive Council to reduce the number of concurrent sessions, and in particular those reporting on the results of a single experiment. The reduction in papers is a possible concern, given Council's

Figure 1. Number of presentations by year.

emphasis on sustaining the opportunity for all strong work to have a place on the program, which may also have an impact on attendance. An updated version of the convention data and associated analyses will be provided at the upcoming convention and in the summer issue of Inside Behavior Analysis. After the convention, all of the relevant data will be carefully examined by the Program Committee, without the committed work of the area coordinators the ABAI office, and Executive Council. In addition, beginning this year, we expect that the Program Committee outstanding efforts, there would by no convention. Finally, will hold a half-day meeting immediately after the convention to explore additional opportunities to enhance the convention experience for presenters and attendees.

Area Coordinators

The hard work and effort of the area coordinators resulted in 52 invited presentation submissions and tutorials. Moreover, 18 of the invited presenters were non-ABAI members (i.e., B. F. Skinner lecturers). The individuals who contributed to this process include new area co-coordinators, Dr. Matthew

Johnson (BPH), Dr. Eric Johnson (EAB), Dr. Julie Slowiak (OBM), Dr. John Guercio (PRA), Dr. Amoy Hugh-Pennie (TBA), and Dr. Judah Axe (VRB).

I would especially like to thank my co-chair, Jesse Dallery, for his diligent and invaluable contributions to the convention program over the last four years. In addition, and other members of the Program Committee for their on behalf of the Program Committee, I would like to thank Maria Malott and her exemplary staff members for their support and guidance.

Available at the 41st Annual Convention Registration Desk:

On-site registration Pre-registration badge pick-up Purchace family badge Workshop registration Purchase continuing education packages Become an ABAI member (and save on registration!) Register for upcoming ABAI conventions and conferences

Name Badges

Name badges are required for entry into all ABAI events and presentation rooms, and for access to ABAI on-site services, including the bookstore, exhibits, and job placement services. Registrants receive a name badge on site. Replacement name badges will be provided for \$20. Your name badge will be printed with your preferred first name (nickname) in addition to your full first and last name and affiliation.

Family Badges

Family attending only your convention presentation must purchase a family badge for \$10 or they will not be permitted into your event.

Convention Materials

Attendees may pick up their name badges, any workshop tickets, and other materials at the pre-registration desk.

Cancelation Policy

Requests for registration refunds for the 41st Annual Convention in San Antonio, TX-minus a \$75 cancellation fee-will be met provided they are made prior to midnight (EDT) May 1, 2015.

Transfer Policy

Requests for registration transfers (attendee replacements) for the 41st Annual Convention in San Antonio, TX, received by midnight (EDT) May 1, 2015, will be processed in the ABAI office prior to the convention. Requests made after this date will be processed on site at the registration desk. There will be a \$75 processing fee for transfers.

Preconvention Workshops

Admission to workshops is by ticket only. You must present your ticket at the door to attend. Workshops may be canceled due to low enrollment, so advance registration is advised. Registrants will receive workshop ticket(s) at the registration desk.

2015 Opening Event and Awards Ceremony 2015 SABA Awards

CHAIRED BY MICHAEL PERONE (WEST VIRGINIA UNIVERSITY) SATURDAY, MAY 23, 11:30 AM-12:50 PM

The Society for the Advancement of Behavior Analysis (SABA) provides financial support for the field of behavior analysis. As a 501(c)(3), nonprofit organization, SABA accepts tax-deductible donations, distributes donations through grants and fellowships, and recognizes leaders in behavior analysis with its annual awards ceremony.

Award for Distinguished Service to Behavior Analysis Sigrid Glenn

(University of North Texas)

Dr. Sigrid Glenn's passionate commitment to the future of behavior analysis has resulted in numerous contributions to her chosen field. She has co-authored four books and more than 45 articles and book chapters. Although her early research was mainly in applied areas, she is widely recognized for her later conceptual work on selection at behavioral and cultural levels. As founding chair of the Department of Behavior Analysis at the University of North Texas, Dr. Glenn established master's and bachelor's degree programs in behavior analysis, leading the facult

in the first accreditation of a graduate program by ABAI. With characteristic prescience about important developments in the field, Dr. Glenn, a charter certificant of the Behavior Analysis Certification Board (BACB), also led the faculty in developing the first Internet sequence of behavior analysis courses approved by the BACB. Dr. Glenn has served as editor of *The Behavior Analyst* and on the editorial boards of several other journals. She is a former president of ABAI (1993–1994), a fellow of Division 25 of the American Psychological Association, and Regents Professor of Behavior Analysis at the University of North Texas.

Behavior Analysis 1970-2015: A Personal Perspective

Life as a behavior analyst for Dr. Sigrid Glenn began some 30 years after B. F. Skinner's

momentous publication of The Behavior of Organisms. In 1970, the history and status of behavior analytic work could be summarized in 19 chapters in Honig's Operant Behavior: Areas of Research and Application (1966). And a two-volume compendium of reprinted articles provided easy pre-Internet access to 98 original works on concepts, principles, methods, and applications of behavior analysis (Ulrich, Stachnik, and Mabry, 1966 and 1970). Further, as a new graduate student, she could reasonably set out to read all 12 volumes of the Journal of the Experimental Analysis of Behavior and the one volume of the Journal of Applied Behavior Analysis that then existed. Most exciting to Dr. Glenn, Skinner's newly published Contingencies of Reinforcement offered a coherent worldview that replaced a muddle of incoherent ideas. Behavior analysis was very different then. Looking back on the subsequent 45 years, Dr. Glenn will recount a few of the events that seem to capture the changes she has seen, and reflect on the relevance of those changes to the future of behavior analysis as a coherent whole. Finally, a brief survey of several future paths behavior analysis may take is followed by a recommendation for one that seems best to support disciplinary coherence.

Glenn established master's and bachelor's degree programs in behavior analysis, leading the faculty in the first accreditation of a graduate program by ABAI. With characteristic prescience about important developments in the field, Dr. Glenn, Michael Keenan

(University of Ulster)

Dr. Michael Keenan is a Fellow of the British Psychological Society and a senior lecturer and Distinguished Community Fellow at the School of Psychology at the University of Ulster in Coleraine, Northern Ireland. He is the founder of the charity Parents Education as Autism Therapists (PEAT; www.peatni.org) and he received the Award for Promoting Equality of Opportunity from the British Psychological Society and the Personal Achievement Award from the New York State Association for Behaviour Analysis for his work of bringing applied behavior analysis to children with ASD in Ireland. He is the father of four young children.

Science and the Treatment of Autism: A Multimedia Package for Parents and Professionals

There is a severe shortage of training courses across Europe to prepare professionals to meet the needs of parents whose children are diagnosed with autism. To address this concern, and the resulting myths about applied behavior analysis that have sprung up, "Leonardo"-a former part of the European Commission's Lifelong Learning Programme-supported two projects to further development of an innovative multimedia program first developed in Northern Ireland by the local charity PEAT and behavior analysts from the University of Ulster. Called Simple Steps, this multimedia program uses video material in the form of parental testimonies, animations, demonstrations, and text to teach the principles of applied behavior analysis. The projects funded by Leonardo were called STAMPPP and they included partners from the UK, Norway, Spain, Italy, the Netherlands, Sweden, Iceland, and Germany; another group from Portugal obtained funding independently to develop the program. For some partners, this was the first time that there would be material on behavior analysis in their own language. In this presentation, Dr. Keenan will show examples of the resources that were developed and encourage others to think about the importance of moving beyond static images when teaching about something dynamic, like behavior.

Award for Effective Presentation of Behavior Analysis in the Mass Media

Susan M. Schneider

(University of the Pacific)

Dr. Susan M. Schneider's involvement in behavior analysis goes back to high school when she read Beyond Freedom and Dignity and wrote to B. F. Skinner, never dreaming that he would reply. They corresponded throughout her masterlevel education in mechanical engineering from Brown University, her engineering career, and her where he received training in the experimental stint in the Peace Corps. At that point, Schneider analysis of behavior. He is currently a professor bowed to the inevitable and switched careers, earning a Ph.D. from the University of Kansas and holding faculty positions at St. Olaf College, Journal of Applied Behavior Analysis (JABA) on a Auburn University, and Florida International University. A research pioneer in the quantitative analysis of behavior, her publications also cover

the history and philosophy of behavior analysis and its biological context. Building on this background, her book for the public-The Science of Consequences: How They Affect Genes, Change the Brain, and Impact Our World-describes operant principles, their role in the nature-nurture system, and their full range of applications. It earned a mention in the journal Nature, was a selection of the Scientific American Book Club, and took Schneider on a book tour across the United States and Scandinavia. She has also appeared on national radio programs. The SABA award letter took note of the book's engaging style and broad scope, calling it "extraordinary."

Putting It All Together: Interdisciplinary Behavior Analysis for the Public

Sustainability, education, workplace safety, language development, addiction, autism... the list goes on and on. Behavior analysis applies very broadly indeed, and is inherently interdisciplinary. Susan M. Schneider How can we best get our scientific principles recognized, valued, and used in all the areas they apply? One approach is to reach out to the public directly. In The Science of Consequences, Dr. Susan M. Schneider sought to cover the full range of our science and its applications, simultaneously highlighting many connections with other fields. This inclusive approach seems valuable for the sake of both science and dissemination: We now know how fully operant principles interact with others in the large and complex nature-andnurture system, for example. Can we do better at getting the word out about all that we have to offer? In this presentation, Dr. Schneider will explore this continuing challenge as well as celebrate our progress.

Award for Scientific Translation

Ron Van Houten

(Western Michigan University)

Dr. Van Houten received his BA from the State University of New York at Stony Brook and his MA and Ph.D. from Dalhousie University, of psychology at Western Michigan University. Dr. Van Houten has published extensively in wide variety of problems, such as the education of inner city youth and children with "learning See AWARDS on page 10

Ron Van Houten

AWARDS continued from page 9

disabilities," the treatment of children and adults with developmental delays, the treatment of clinical problems in children, traffic safety, energy conservation, and aviation safety. Currently, Dr. Van Houten is a member of the Transportation Research Board and a member of the National Committee for Uniform Traffic Control Devices. He is a past assistant editor for JABA and a Fellow of ABAI. Dr. Van Houten is also an avid pilot of powered aircraft and gliders and a flight instructor.

How Can We Increase the Impact of Behavior Analysis in Solving Problems in New Areas? Behavior analysis is a powerful tool that could ameliorate many of society's problems. One of the first problems seriously addressed with a behavior analytic approach was the treatment

of autism. Although a behavioral approach yielded promising results from the start, it took many years before the behavioral approach was accepted as the treatment of choice for autism. Although promising data also have been obtained from applications of behavioral technology to other social problems, these applications have not yet been widely accepted or disseminated. B. F. Skinner envisioned behavior analysis as a technology that would address a wide variety of societal challenges. Initially, behavior analysts were highly enthusiastic about society adopting our approach in areas such as education, but many people already working in these fields were resistant. This paper will examine a number of areas where behavior analysis could make a difference, and explore ways to overcome obstacles and accelerate acceptance.

The Society for Quantitative Analyses of Behavior Tutorials

The Society for Quantitative Analyses of Behavior (SQAB) will be sponsoring the following tutorials at the 41st ABAI Annual Convention in San Antonio:

B = f(0, E): Implications of Quantitative Models of Behavior for Translational Research and Practice Eric Jacobs (Southern Illinois University) May 23, Saturday; 1:00 pm–1:50 pm

The Molar View of Self-Control Howard Rachlin (Stony Brook University) and William M. Baum (University of California, Davis) May 23, Saturday; 2:00 pm–2:50 pm

AB&L Revisited: Whither Adaptive Behavior and Learning? John Staddon (Duke University) May 23, Saturday; 3:00 pm–3:50 pm

To Infinity and Beyond: Why Zoos and Other "Nontraditional" Settings Are Important to the Future of Behavior Analysis Christina Alligood (Disney's Animal Kingdom® Science Operations) May 23, Saturday; 4:00 pm-4:50 pm

More information on the SQAB tutorials can be found in the program book and on the ABAI website. For more information on the schedule for the SQAB conference, please see page 33.

Convention Highlights

2015 ABAI Presidential Address:

Behavior Analysis Without Borders Monday, May 25, 5:00 pm-5:50 pm Lila Cockrell Theatre (Convention Center) Maria Martha Hübner

(University of São Paulo)

Dr. Hübner is a professor of experimental psychology at the Institute of Psychology, University of São Paolo; Coordinator of After Graduation-PSE-IPUSP; and past president and a member of the Brazilian Society of Psychology. She conducts research at the Laboratory for the Study of Verbal Operants Maria Martha Hübner (LEOV) involving complex mannering processes in the acquisition of symbolic behaviors such as reading, writing, human dialogue, and verbal episodes. She is currently immersed in two areas of research: investigating the empirical relationship between verbal and non-verbal behavior, and analyzing the processes of control for minimum units in reading through the paradigm of relations equivalence.

Abstract

Sarah Blaffer Hrdy

Under the leadership of its Executive Council, ABAI has been crossing geographical borders for the last four decades, disseminating behavior analysis around the world through grants and awards, support of chapters on five continents, and conferences that welcome participation from behavior analysts across the globe. The consistent and unique epistemology of behavior analysis means that geographical borders need not be impediments to the advancement of our field. Paradoxically, however, the domains within behavior analysis (basic research, applied research, service delivery, and theory and philosophy) have created borders that have not been easy to cross or navigate, although many authors have pointed out that such navigation is critical. The ABAI Program Committee has been suggesting to presenters who primarily do basic research to discuss the applied implications of their work, and vice versa. Nevertheless, many behavior analysts still see our field as fragmented. What are the contingencies that make interaction as good at understanding the intentions of others among the different domains of behavior analysis so difficult? What are the contingencies that control the wrong assumption that some

domains are more important than others? These contingencies will be analyzed, and recent data and data from the literature will be presented.

2015 ABAI Presidential Scholar's Address: The Origin of Emotionally Modern Humans: How Did Humans Become Such "Other-Regarding" Apes? Sunday, May 24, 5:00 pm-5:50 pm

Lila Cockrell Theatre (Convention Center) Sarah Hrdy

(University of California-Davis)

Sarah Blaffer Hrdy is professor emerita at the University of California-Davis, an associate in the Peabody Museum of Archeology and Ethnology at Harvard, and A. D. White Professor-At-Large at Cornell University. A former Guggenheim fellow, she has been elected to the National Academy of Sciences, the American Academy of Arts and Sciences, the California Academy of Sciences, and the American Philosophical Society. Her books include The Langurs of Abu: Female and Male Strategies of Reproduction; The Woman That Never Evolved, selected by The New York Times as one of the Notable Books of the Year in 1981; Mother Nature: A History of Mothers, Infants and Natural Selection, which won the Howells Prize for Outstanding Contribution to Biological Anthropology and was chosen by both Publisher's Weekly and Library Journal as one of the "Best Books of 1999"; and Mothers and Others: The Evolutionary Origins of Mutual Understanding, an exploration of psychological implications of humankind's long legacy of shared child-rearing, which was awarded the 2012 J. I. Staley Prize from the School of Advanced Research and a second Howells Prize.

Abstract

Abstract: Humans are remarkably similar to other apes. Like us, chimpanzees and orangutans are extremely clever, use tools, and exhibit rudimentary understanding of causality and what others intend. However, other apes are not nearly nor nearly so eager to accommodate or help them. By contrast, right from an early age, humans are eager to help and share. It was this combination

of understanding what others intend along with impulses to help and please them that enabled our ancestors to coordinate behavior in pursuit of common goals-with spectacular consequences later on. So how and why did such other-regarding capacities emerge in creatures as self-serving as nonhuman apes are? And why did they emerge in the line leading to the genus Homo, but not in other apes? In her lecture, Dr. Sarah Hrdy explains why she became convinced that the psychological and emotional underpinnings for these "other-regarding" impulses emerged very early in hominin evolution, as byproducts of shared parental and alloparental care and provisioning of young. According to widely accepted chronology, large-brained, anatomically modern humans evolved by 200,000 years ago, while behaviorally modern humans, capable of symbolic thought and language, evolved more recently still, in the past 150,000 or so years. But Hrdy hypothesizes that emotionally modern humans, interested in the mental and subjective states of others emerged far earlier, perhaps by the beginning of the Pleistocene 1.8 million years ago.

Professional **Development Series**

The Professional Development Series is an initiative of the ABAI Student Committee. All attendees are welcome.

Friends of SABA Reception

Chair: Michael Perone (West Virginia University)

Friday, May 22, 6:00 pm-7:30 pm Lonesome Dove (Convention Center) ABAI members who made donations to the Society for the Advancement of Behavior Analysis (SABA) in 2013 and 2014 are invited to a reception in honor of their contributions and commitment to the field. We are very grateful for the generosity of those who support the activities of ABAI and SABA.

International Reception

· Leonard Green (Washington University) Chair: Ingunn Sandaker (Oslo and Akershus

University College of Applied Sciences) Lone Star Ballroom A (Grand Hyatt) Warren K. Bickel (Virginia Tech Carilion The International Reception is scheduled to welcome international members and review the international development of behavior analysis being conducted at ABAI. All members are welcome.

Affiliated Chapters Leadership Training

Chair: Gordon Bourland (Trinity **Behavioral Associates**)

Saturday, May 23, 8:00 am-11:00 am Lone Star Ballroom B (Grand Hyatt) ABAI training sessions are great opportunities for chapter leaders to gain knowledge and expertise on issues of central importance to their ABAI affiliated chapters. This training is for chapter leaders only. Although the chapter training is free for up to three officers per chapter, advance registration is required. This event is closed; attendance is by invitation only.

Special Interest Group Leadership Trainina Chair: Christy A. Alligood (Disney's

Animal Kingdom)

Saturday, May 23, 9:00 am-11:00 am Lone Star Ballroom A (Grand Hyatt) ABAI is pleased to offer a Leadership Training Session for officers of ABAI Special Interest Groups (SIGs) for the purpose of providing strategies for guiding the growth of SIGs and providing services to members and constituents. This training is for SIG leaders only. Topics are being finalized. Attendees will have the opportunity to discuss strategies for growth and service provision with other SIG leaders. Although the SIG training is free for up to three officers per SIG, registration is required. This event is closed; attendance is by invitation only.

Health, Sports, and Fitness Special Interest Group: Yoga Session

Chair: Danah Mulqueen (University of South Florida)

Sunday, May 24, 6:00 am-6:50 am Bonham E (Grand Hyatt)

Please join us for this annual HSF SIG event. No experience is necessary. Please bring a towel or mat, water bottle, and comfortable clothes This 1-hour session will strengthen, lengthen, and rejuvenate you after a long conference day. Come early, we fill the room! Namaste!

See HIGHLIGHTS on page 21

Health, Sports, and **Fitness Special** Interest Group: Tai Chi Morning Session

Chair: Jill L. Basso (private practice)

Monday, May 25, 6:00 pm-6:50 pm Bonham E (Grand Hyatt) Please join us for this newly added Tabata session to get your body moving. Be sure to bring a large towel or mat, a water bottle and the desire to burn calories! This is a high intensity interval training work out session will energize you! Come early, we fill the room!

Health, Sports, and Fitness Special Interest Group: Tai Chi Evening Session

Chair: Jill L. Basso (private practice)

Monday, May 25, 6:00 pm-6:50 pm Bonham E (Grand Hyatt) Join us for this fluid movement Tai Chi session. No experience is necessary. Please dress comfortably. Bring along a water bottle and an open mind. Get there early, so we can fill the room!

ABAI Social

Chair: Martha Hübner (University of Sao Paulo)

Monday, May 25, 9:00 pm-1:00 am Grotto (Convention Center) Please join us, your friends, and colleagues for music and dancing. From 9:30-10:30, the ABAI Student Committee welcomes all members to join them for a panel discussion, "Pavlov, Skinner, & Kantor Walk Into a Bar..." between three great luminaries. Members of this panel will respond to questions by impersonating a prominent figure from the history of psychology. This year's line-up includes Michael Domjan as Ivan Pavlov, Philip N.

Hineline as B. F. Skinner, Linda J. Hayes as J. R. Kantor, and Michael Perone as the moderator. Discussion will be both enlightening and entertaining.

Reunions and Receptions

All reunions on Sunday, May 24, at 9:00 pm-11:00 pm in either the Grand Hyatt. Texas Ballroom Salon F (Grand Hyatt) Additional information is listed in the program book and on the ABAI website under the names of the chairs.

ABAI's Continuing Education Program

General Information

One of ABAI's primary objectives is to provide educational opportunities for members and other professionals to review recent research, discuss current theoretical issues, and learn new methods in the application of behavior analysis to societal problems. While ABAI does not require participation in the continuing education (CE) program for membership, involvement is encouraged.

The CE program is designed to meet needs for self-improvement and to provide continuing academic training for psychologists and behavior analysts as required by many licensing associations and specialty boards. ABAI maintains records of all CE credits.

Workshop Registration Instructions

You may pay membership dues and register for workshops and the convention online at www. abainternational.org. Workshops are subject to cancellation due to low enrollment, so advance registration is advised.

Detailed Instructions

Review workshop offerings on the following pages. Descriptions of all workshops are located on the ABAI website. CE credit is included in the workshop fees. After determining which workshops you would like to attend, go to the ABAI website and log in to your personal portal account (please contact the ABAI office if you have trouble accessing your portal account). Once logged in, click on "41st Annual ABAI Convention, San Antonio, TX, 2015" in the "Personal Schedule" tab.

You may pay for workshops by selecting the "Add to Cart" button located after each workshop's detail. When you are finished selecting workshops, you may pay for them by clicking the "Checkout" link at the top of each search results page. Please note, to check out, you will be asked to log in to your ABAI portal account if you are not already logged in. You may select "Cart" located in the upper right corner Behavior Analysts, Board Certified of every page to view the items you have Assistant Behavior Analysts, and added to your cart for purchase. All payments must be made in U.S. funds.

Convention registrants may purchase ABAI's CE Offerings a complete CE package for a flat fee of \$85 at the Registration Desk on site.

Cancellations and Refunds

Registrants may cancel convention registration and tickets for workshops or other events before May 1, 2014. A handling fee of \$75 per cancellation will be deducted from all refunds. Refunds will not be granted after May 1, 2014.

ABAI CE Credit for Psychologists and **Behavior Analysts**

ABAI is approved by the Behavior Analyst Certification Board (BACB) to offer Type 2 CE to certified behavior analysts who have passed their exams and have been issued current and valid certification numbers. ABAI is approved by the American Psychological office at (269) 492-9310 or by email at Association (APA) to sponsor continuing education for psychologists. ABAI maintains responsibility for this program and its content.

Workshops

CE for psychologists and behavior analysts will be available for select preconvention workshops. Sign-in/out sheets and all other documentation will be available at the workshops.

Convention Sessions

Sessions being offered for CE for behavior analysts may be previewed on the ABAI website along with their abstracts. If you wish to earn CE for convention sessions, pick up a CE packet,

which contains all necessary information, from the ABAI CE or registration desks prior to attending sessions.

The intended audience for CE for convention sessions is Board Certified psychologists.

ABAI is approved by the American Psychological Association to sponsor continuing education for psychologists. ABAI maintains responsibility for this program and its contents. ABAI is approved by the Behavior Analyst Certification Board (BACB) to offer type 2 continuing education for board certified behavior analysts and board certified assistant behavior analysts.

Documentation

CE certificates will be posted in attendees' portal accounts upon receipt of payment. ABAI will provide documentation of conference, workshop, and convention session attendance at no additional charge upon request. If you have questions please contact the ABAI mail@abainternational.org.

Ethics

ABAI expects its members to uphold the highest standards of personal and professional behavior in the conduct of their work and the advancement of behavior analysis. ABAI embraces the diversity of professions within its membership; thus, each ABAI member should adhere to the ethical standards that have been defined for his or her profession.

ABAI's Pre-Convention Workshops

Please see the ABAI website (http://www.abainternational.org/events/programdetails/summary.aspx) for detailed workshop information including descriptions, learning objectives, activities, and recommended audience. This information will also be included in the convention program book. Select pre-convention workshops are available for continuing education credit for behavior analysts certified by the Behavior Analyst Certification Board (CE: BACB) and for psychologists licensed by the American Psychological Association (CE: PSY). Convention registrants may purchase a complete CE package for a flat fee of \$85 at the Registration Desk on site, in addition to the cost of registration listed. Late registration costs are valid until May 1, 2015. After that date, workshops must be registered for on site and at the on-site fee.

Friday, May 22 8:00 am-11:00 am

1 Treating Children With Behavioral and Emotional Disorders: Integrating Emotional and Moral Behaviors to Promote Generalization

Jeannie A. Golden East Carolina University CE: PSY/BACB Pre-registration: \$150 (member); \$175 (nonmember) On-site: \$175 (member); \$215 (nonmember)

Every business has different goals and requirements. And an insurance policy is just the beginning. At Huntington Insurance, Inc., our agents take the time to get to know your business, helping you choose the proper coverage. Then we take it a step further, passing along our knowledge of risk management and employee benefits to help your business identify ways to lower risk. Most important of all, we make sure the policies we recommend are some of the best options for meeting the specific needs of your business. Give us a call to set up an appointment with one of our licensed agents.

For your ABAI professional liability insurance needs, call Mike Dercoli or Gina Maher toll free at 866-318-5028 or email at mail@insurance-abai.com.

Log into your ABAI portal today and get your free quote on professional liability insurance! Membership with ABAI required for special discounted pricing on professional liability insurance.

Innovative, Science-Based Approaches: **A Recap of the Ninth Annual**

BY WAYNE W. FISHER, JENNIFER R. ZARCONE, AND MARIA MALOTT

'N JANUARY, ABAI hosted the Ninth Annual Autism Conference in Las Vegas, Nevada. With more than 700 attendees from all over the US and the world, the event far exceeded our expectations for a successful conference. Now, we're happy to announce that you'll be able to experience this conference from the comfort of your home or office and learn about the most recent developments and innovations in the science and application of autism treatment, thanks to the ABAI Learning Center. Through this feature on our website (www.abainternational.org/learning-center), you will gain access to our full line-up of workshops and invited presenters. Whether you are intending to use the content for classes, training, continuingeducation credit, or for keeping up with the latest information on behavioral research and therapies related to autism spectrum disorders (ASD), you're sure benefit from the quality and delivery of our conference presentations.

In the Learning Center module for this event, you will find a diverse selection of topics and presenters to choose from. True to our conference theme—innovative, science-based approaches—the Learning Center now features speakers known for their commitment to behavior analysis and for pushing the science and practice to address the evolving challenges and concerns Utism

involved in working with this population. If you have an interest in the basic research side of ASD treatment, you would do well to start with talks by Leonard Abbeduto ("Language Development in Fragile X Syndrome: Variation, Mechanisms, and Treatment"), Elizabeth Aylward ("Neuroimaging of Face Processing in Autism: Can We Make Sense of Inconsistent Findings?"), and Timothy Vollmer ("Recent Behavioral Research on Restricted Inflexible Behavior"). If you're looking to expand your knowledge on assessments, check out the presentations given by Dorothea Lerman ("Linking Assessment and Treatment in Acquisition Programs for Children With

> Autism") and Gregory Hanley ("Toward a Safer,

Conference

Faster, and Better Functional Analysis of Problem Behaviors Associated With Autism"). Want to add to your therapy toolbox? You'll find what you're looking for with lectures from Steven Hayes ("Using Acceptance and Commitment Therapy to Provide Parental Support"), Robert Koegel ("Autism, ABA, and Pivotal Response Treatment"), and Anna Pétursdóttir ("Using Stimulus Pairing Procedures to Induce New Vocalizations"). Finally, be sure to watch Lorri Unumb's talk ("Autism Insurance Reform Across America") to learn more about autism advocacy and how to confront the challenges of obtaining insurance coverage. Each of these talks is available individually, but for a more complete conference experience, you'll want to purchase the full invited speaker package to save on the entire set of presentations.

If you're looking for a more in-depth

examination of applied behavior analysis and ASD, you'll be happy to find that the Learning Center also offers both pre-conference workshops. In ""Early Intervention for Young Children With Autism: Best Practices for Receptive Language Instruction," listen to Linda LeBlanc describe the importance of building effective and efficient teaching strategies and learn how to prevent-and if necessary, correct-ineffective teaching. Then, watch Steven Hayes's "Using Acceptance and Commitment Therapy to Provide Parental Support" to gain a better understanding of the behavioral rational for addressing the thoughts and feelings of parents of children with ASD and how to use acceptance and commitment therapy to overcome emotional barriers to learning. You can find both these presentations under "workshops" on the Learning Center page. Purchase them individually or buy the "Ninth Annual Autism: Workshops 1 & 2" package to save!

The conference also included two poster sessions on Friday and Saturday, featuring nearly 150 displays on the latest behavioral research in autism. Posters are an excellent opportunity not only for conference attendees to learn more about a wide range of topics, but also for students, researchers, and practitioners to discuss their work and connect with others who share similar interests. As we

ntion

prepare for the 10th Annual Autism Conference, be sure to products, services, and programs in front of the scientists, check the ABAI website during the summer when we will be launching the Call for Posters. Get a head start and begin to research and practice in behavior analysis and who are

preparing your submission for 2016! By completing a poster submission, you'll not only be on your way to joining us in New Orleans, but you'll become part of a conference program that has been an important source for the latest information on ASD research and innovation for a decade. Save the date for January 18-20, 2016, and keeping checking the ABAI events page (www.abainternational. org/events) for updates on registration, invited speakers, hotels, and more.

If you're in charge of an organization or university department and have employees,

students, or faculty making poster submissions, please consider purchasing an exhibit booth for the upcoming conference. This will give you an opportunity to put your

Perfect Attendance

Special thanks to the people listed below for attending every ABAI autism conference to date. The support and dedication of such individuals has helped to keep this event strong and a fixture of the ABAI calendar.

practitioners, students, parents, and teachers committed

facing challenges that will be best overcome with the assistance of your organization. For more information on exhibiting at the 10th Annual Autism Conference in New Orleans, please contact the ABAI office (mail@ abainternational.org) or visit our website.

This conference would not have been a success without the support and hard work of the conference Program Committee. We are grateful to Richard W. Malott for helping to coordinate continuing education for certified behavior analysts and licensed psychologists. Finally, thanks to the ABAI staff for

providing logistical and administrative support leading up to and during the conference. We hope you join us for fun and learning at the Hyatt Regency New Orleans in 2016!

membership your key to excellence

Conferences

ABAI conducts multiple conferences each year. Our annual convention features the contributions of approximately 5,000 participants from more than 50 countries.

An annual autism conference convenes those treating or studying autism.

Special conference topics from our recent past include apps, games, and technology; theory and philosophy; and behavioral economics.

A biennial international conference promotes the science of behavior analysis to chapters and universities throughout the world. Recent host cities include Oslo, Granada, and Mérida.

University Program Accreditation

ABAI sets standards for the accreditation of educational programs in behavior analysis at the bachelor's, master's, and doctoral level.

These standards are designed to encourage and support exemplary training of behavior scientists and scientist-practitioners in the experimental and theoretical foundations of behavior analysis and in ethical and evidence-based practice.

Jobs in Behavior Analysis

Members post thousands of job openings and resumes online annually, through our JobTarget job board. This has become an industry hub for employers and job seekers alike.

Special Interest Groups

ABAI supports 36 special interest groups (SIGs) covering the scope of behavioral study and treatment, and welcomes applications from members interested in creating new groups in emerging areas of the field not yet served by such a group.

Publications

ABAI has partnered with Springer, an international publisher for scientific journals, to manage our publishing. Already we have refined the electronic interface for journal management, streamlined editorial review for editors, and hastened publication for authors. Below is a list of our publications:

The Psychological Record The Behavior Analyst The Analysis of Verbal Behavior Behavior Analysis in Practice Inside Behavior Analysis
